## Commitment

### Endorsement of Campaign and Key Principles

- **Daugavpils City Council** is pleased to join the Energy Management Campaign and endorse the key principles for international engagement on ISO 50001.

### Reasons for Joining Energy Management Campaign

- Daugavpils City Council believes that energy management systems ISO 50001 are a key tool for meeting global climate and energy goals.
  - Daugavpils City energy management system ISO 50001 is a part of Sustainable Energy Action Plans (SEAPs) until 2020 (approved 10.11.2016.). Municipality has voluntarily committed to reduce GHG emissions in the whole territory of the city until 2020 by 10%, compared to 2010.
  - Daugavpils energy management system has targets for 2017: to reduce the energy consumption by 3% (3.8 TJ) in 10 municipal buildings with the highest energy consumption; to reduce the electricity consumption by 1% (0.2 TJ) in 10 public lighting lines; to reduce consumption of diesel fuel by 1% (0.4 TJ) in public transport.
  - In order to fulfil these targets, Daugavpils has developed a yearly action plan for 2017 with the most urgent and systematic measures, attracting municipal, state and European Union funds financial support.
- The Energy Management Campaign will support our efforts to promote ISO 50001 by Daugavpils City Council in the public sectors (public buildings, street lighting system and transport), for rational managing of the objects owned by the municipality, for reducing of costs, for improving the competitiveness and redirect savings for the development.

### **Commitment Statement**

- To boost implementation of ISO 50001, Daugavpils City Council commits to expand boundaries of ISO 50001 certification and include municipal capital companies.
- Furthermore, Daugavpils City Council commits to contributing to Campaign international technical cooperation facilitated through the CEM Energy Management Working Group.

### **Closing Statement**

Daugavpils City Council believes that energy management systems ISO 50001 are a key tool for meeting global climate and energy goals. Daugavpils City energy management system ISO 50001 is a part of Sustainable Energy Action Plans (SEAPs) until 2020. Municipality has voluntarily committed to reduce GHG emissions in the whole territory of the city until 2020 by 10%, compared to 2010. Daugavpils energy management system has targets for 2017: to reduce the energy consumption by 3% (3.8 TJ) in 10 municipal buildings with the highest energy consumption; to reduce the electricity consumption by 1% (0.2 TJ) in 10 public lighting lines; to reduce consumption of diesel fuel by 1% (0.4 TJ) in public transport.
